Genetics Department
University of Wisconsin
Madison, Wisconsin

Dear Josh:

Stanley K. Shapiro recently wrote enquiring about the possibility of working with me for a year or so. He got his degree from Wisconsin, and said you would know him.

I would appreciate your opinion of him.

As you may know I moved over to Brady this fall - so far the move has been for the good - you probably also know that Burkholder left for the University of Georgia, thus Osborn Botanical Laboratory has run nearly an entire cycle.

With best regards,

As ever,

David Bonner
